HOW TO USE IN 4 STEPS

1

APPLY ADHESIVE

Apply enough tile adhesive and place the first tile. Make sure it is perfectly level.

2

INSERT CLIPS

Slide the clip(s) under the tile and press the tile into the adhesive. Place the next tile on the base of the clip(s).

3

LEVEL THE TILES

Insert the wedge into the clip. Use the LEVELIT plier or press the wedge firmly into the clip until the tiles are perfectly level.

4

REMOVE THE CLIPS

Leave the wedges in place. Once the adhesive has almost fully cured, remove the clips and wedges by tapping them in the direction of the joint.
